To Whom it may concern,

I am interested in a position as a software developer at Mentor, a Siemens business. I am graduating from Portland State University in March 2019 with a Bachelors of Computer Science degree and have experience in C-like languages, several scripting languages, and experience in Linux development. In my coursework I wrote a scheduler for the xv6 kernel as well as several OpenGL programs. During my time at Portland State I worked as the Assistant of the Head of Information Technology at the Maseeh College. My responsibilities in that position were to handle scheduling, communication, research, and tracking the finances of purchasing new computing equipment for faculty.

I hope to hear from you in the future,

Christopher Bartlett
